About Me

I love to <Code/> ツ

A Savvy Full-Stack Web Developer with +5 years of industry experience in Web Development, Mobile Development, and DevOps. Solid skills in designing, enhancing, developing, deploying, and maintaining web and mobile applications. High honors graduate in Computer Engineering with a broad range of technical skills, Experienced in working with different frameworks. Currently, working with three languages (JavaScript, PHP, Python). Particularized as a full-Stack programmer in numerous commercial projects. Supervised over +100 WordPress Websites, Full-stack Web, and Mobile projects, using the latest reputable and popular technology stacks.

I have unlimited Work Entitlements and available to work in teams, with peers, or individually full-time anywhere in Australia.

Professional Skills

- **Programming Languages:** JavaScript, TypeScript, PHP, Python, C++ , C , ORCID/IDL (NPM and ROSS), SQL
- **Markup:** HTML5, CSS/SCSS (SASS/LESS), XML, JSON
- **Applications:** PostMan, VSCode, Figma, Adobe XD, ClickUp, Docker
- **Libraries and Frameworks:** jQuery, NodeJs, ReactJs, Bootstrap, Tailwind, MaterialUiEUI, StoryBook, ExpressJs, Redux, Material UI, ESLP, mohm.Js, Ionic, PWA, Cypress, React-router and a thousand more...
- **Operating Systems:** Linux (Ubuntu, RedHat), macOS, Windows
- **Version Control:** Git
- **Active Frameworks:** React or node.js, How to match, React Native for mobile devs, Laravel, Express.js, Adonis.js, Django, GraphQL, Next.Js, Socket.io
- **CMS platforms:** WordPress, Theme and Plugin Development
- **Essential Skills:** Critical Thinking, Patience Solving, Debugging, Time Solving, Documentation
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Microservices Communication:** REST API, WebSocket, gRPC, tRPC
- **Cache Server:** Redis

Personal Skills

- Enthusiastic and able to quickly read data, understand and utilise new technologies and frameworks fast, seek new challenges in a fast-paced environment, and available to work with tight schedules with minimum supervision. Has the ability to understand, enhance and implement complex business requirements into an online business project.
- Communicate effectively with technical peers. Excellent problem-solving skills.
- Enthusiastic and able to quickly read data, understand and utilise new technologies and frameworks fast, seek new challenges in a fast-paced environment, and available to work with tight schedules with minimum supervision. Has the ability to understand, enhance and implement complex business requirements into an online business project.
- Ability to work autonomously as well as collaboratively in a team environment.
- Flexible and adaptable approach to problem solving.

Work Experience

Oct 2021 - Present
Front-end Developer (ITMindtream - Australia)

At LTMindtream, innovation meets seamless functionality to redefine the digital landscape. In the realm of cutting-edge technology consulting, LTMindtream stands out as a transformative force. As a company dedicated to guiding businesses through comprehensive transformations, we specialize in navigating the path from core operations to immersive experiences, ensuring our clients thrive in the marketplace of the future. LTMindtream possesses a distinctive fusion of engineering and experience DNA, facilitating an accelerated journey for businesses to reach the future faster.

Responsibilities
- Spearhead the development of multiple React applications, seamlessly integrating frontend components with Node.js backend to ensure optimal performance and a cohesive user experience.
- Take ownership of business critical, translating complex requirements into scalable and efficient components, ensuring alignment with both frontend and backend functionalities.
- Collaborate closely with cross-functional teams, including project leads and fellow developers, fostering a culture of innovation and free-flowing ideas to collectively achieve project goals.
- Uphold rigorous coding standards, ensuring adherence to prescribed technical benchmarks to guarantee long-term maintainability and scalability of deployed code.
- Execute comprehensive testing strategies on both frontend and backend, identifying and resolving bugs, errors, and discrepancies to enhance the overall quality and reliability of the software.
- Implement and apply test automation frameworks, adopting a Test-Driven Development (TDD) approach to fortify the reliability of applications.
- Ensure the timely delivery of applications within agile, scrum-based projects, actively contributing to the seamless flow of project milestones and objectives.

Jun 2022 - Oct 2021
Full-Stack Developer (Smp4e - Australia)

At Smp4e.com, innovation meets seamless functionality to redefine the digital landscape. Through the state-of-the-art services and products, Smp4e.com empowers clients to navigate the complexities of the digital world with confidence. With a focus on user-centric design and robust backend technologies, Smp4e.com crafts digital experiences that captivate audiences and drive success.

Responsibilities
- Extend service endpoints using industry best practices in Laravel, with a focus on comprehensive testing for robust functionality.
- Design and adapt isolated how.js components based on specified designs, ensuring seamless integration with the user interface.
- Proficiently design tables, procedures, relationships, views, and functions for relational databases. Create models tailored for MySQL databases, demonstrating a deep understanding of data structure.
- Work closely with the team lead and fellow members, fostering a collaborative environment where ideas flow freely and collective goals are prioritized.
- Uphold coding standards rigorously, guaranteeing that deployed code aligns with prescribed technical benchmarks and ensures long-term maintainability.
- Thoroughly test applications, identifying and rectifying bugs, errors, and mistakes to enhance the overall quality and reliability of the software.
- Implement and apply test automation frameworks, adopting a Test-Driven Development (TDD) approach to fortify the reliability of applications.
- Ensure the timely delivery of applications within agile, scrum-based projects, contributing to the seamless flow of project milestones.

Nov 2019 - Aug 2020
Full-Stack Developer (Zohdegon - ITRAN)

Zohdegon company is two branches with over 35 full-time employees in the leading digital marketing group in Karaj. A complete list of related services together with offering diverse technology stacks depending on client specifications and needs made the brand name on top of all other competitors. Current offered services are Advertisement, Programming Services, Application Maintaining, WebDevs, Mobilapps, SEO, Photography, Motion Graphic, Animation, Logo Design, Instagram administration , Teaser, Content Creation and many more.

Responsibilities
- Collect real-time scenarios and required functionalities based on client specifications, create project's proposal and decide on a proper stack technology.
- Design and adapt isolated how.js components based on specified designs.
- Data modeling and database design (tables, procedures, relationships, views and functions) for relational databases and model creation for MySQL Databases such as mongoDB.
- Apply localization and internationalization to the application.
- Work closely with the frontend and backend team.
- Ensure, through standardization and the best coding standards that deployed code meets standards for technical delivery and maintainability.
- Consult with junior developers about challenges they face during development.
- Lead the team on testing and debugging of the applications and rectifying the bugs, errors and mistakes.
- Make development more efficient to bring a higher standard through the use of testing, process or techniques.
- Apply test automation frameworks and using them in a TDD approach. Ensuring applications are delivered in a timely manner in agile scrum-based projects.
- Web server administration, handle migrations, handle devOps and automation.
- Client and Stakeholder management.

Nov 2018 - Oct 2019
Web Development intern (TechEdge Company - IRAN)

TechEdge Company is a mid-level local application and software development company specialized in creating distributive application primarily in management field. A number of products includes: Accounting management, Team management, Money management and Product management systems.

Responsibilities
- Worked closely with the design team and project managers.
- Discussing client related issues with other developers.
- Participating in team meeting for planning, design and sharing ideas.
- Participating in Web development for a number of projects using HTML, CSS and JavaScript.
- Participating in testing, implementation and maintenance of products after deployment.

Top Projects

(Project entries with technology tags — React.js, Next.js, Bootstrap, Laravel, CSS, HTML, React Native, Redux, TypeScript, MongoDB, Tailwind, GraphQL, Material UI, Django, Android, Socket.io, and others — follow for numerous listed projects.)

Education

Mar 2017 - Nov 2021
Bachelor of Science in Computer Engineering(NIT) accredited program(Eastern Mediterranean University, Famagusta, Cyprus)

- Graduated With high honours and with GPA of 3.94 on a 4.00 scale
- Graduated as top student in the Computer Engineering Department
- Degree completed in just 8 semesters with seven high honour certificates
- Received the "Board of Highest grade in almost all computer-related courses

Coursework:
Programming Fundamentals, Data Structures, Object Oriented Programming, Operating System, System Programming, Analysis of Algorithms, Computer Architecture and Organization, Computer Networks, Database Management Systems, Programming Language Design, Software Engineering

Mar 2012 - May 2016
Diploma of Mathematics (Ferdowsi High School)

"The project is to analyze and implement a new feature for Eastern Mediterranean University such that the students can sort their courses of next and see them more..."

Language Skills

- **Persian:** Native
- **English:** Fluent in reading, writing and speaking — IELTS (L:6.5, R:7.5, W:6 S:7.0, Overall:7.5)
