Summary

Technical Lead and full-stack software engineer delivering production software, the last three on enterprise-scale digital banking platforms at Westpac in Sydney, Australia.

Leads engineering teams through the full delivery lifecycle — from untangling ambiguous requirements and shaping technical design, to setting quality standards, reviewing code, shipping releases, and running production incident root-cause analysis across distributed services. Brings strengths in Test-Driven Development, accessibility (WCAG 2.1 AA), CI/CD and release quality, and AI-assisted, spec-driven engineering with human verification at every step.

Professional Skills

- **Programming Languages:** JavaScript, TypeScript, PHP, SQL (SOLID, DRY and KISS)
- **Frameworks:** React in Next.js, Vue in Nuxt.js, React-Native for mobile, Laravel, Node.js, Express.js
- **Architecture and APIs:** React micro-frontends, Node.js experience APIs (BFF), MVC, REST API, OpenAPI Specification, WebSocket, gRPC, tRPC
- **Testing and Quality:** Test-Driven Development (TDD), Behavior-Driven Development (BDD), Jest, React Testing Library, Cucumber, Selenium WebDriver, Cypress, System Testing, Jira Xray, Cross-Browser & Cross-Device Testing
- **Accessibility:** WCAG 2.1 AA, accessibility testing and remediation with screen readers (NVDA, VoiceOver, TalkBack) and keyboard-only navigation
- **AI-Assisted Engineering:** Spec-driven development, coding agents, Model Context Protocol (MCP), GitHub Copilot, reusable agent skills
- **DevOps and Observability:** CI/CD, Git, Bitbucket, Docker, Splunk, Snyk, SonarQube, Microsoft Azure, AWS
- **Leadership and Delivery:** Technical leadership, code review, software design, root cause analysis, legacy system modernisation, SDLC
- **Libraries and Plugins:** jQuery, Redux, Bootstrap, Tailwind, Material UI, MaterializeUI, Storybook, GSAP, anime.js, Axios, React Router and more...
- **Style sheets and Markups:** HTML5, CSS (BEM, SMACSS), SASS, XML, JSON
- **Applications:** Jira, Confluence, Postman, VSCode, Figma, Adobe XD
- **Database:** MySQL, Postgres, MongoDB Atlas, Redis (cache)
- **Operating Systems:** Linux (Ubuntu, RedHat), macOS, Windows
- **Functional Skills:** Critical Thinking, Technical Solution Finding, Problem Solving, Documentation, UML

Personal Skills

- Leads by example: sets clear technical direction and quality standards, and mentors engineers through code review and day-to-day support.
- Communicates clearly with product owners, designers, QA and partner teams, turning business requirements into practical delivery plans.
- Takes ownership end-to-end, from ambiguous requirements through to production support and root-cause analysis.
- Works autonomously and collaboratively, with a pragmatic and adaptable approach to problem solving.

Work Experiences

Technical Lead (Ampstek Pty Ltd (Westpac Banking) – Australia) (1-Dec 2025 / Oct 2026)

Company's details:

Address: Unit 16/ Ave 28 Belmont Rivervale, WA, Australia 6103

Contact number: +61862450617

Email: contact@ampstek.com

Website: <https://www.ampstek.com/>

Ampstek is a global information technology consulting and services company headquartered in Princeton, NJ, with a presence across multiple countries. The organisation provides end-to-end technology solutions including custom software development, digital transformation consulting, IT staffing & workforce augmentation, and enterprise solutions across diverse industries. As a partner to major clients including Infosys, Ampstek supports technology initiatives that accelerate business outcomes and deliver scalable, client-centric products.

Technical Lead for a cross-functional squad delivering customer and staff servicing journeys on enterprise-scale digital banking platforms. Engaged through Ampstek; the client and place of work was Westpac Banking, Sydney.

Responsibilities:

- Set the team's Test-Driven Development standard with TypeScript, Jest and React Testing Library — e.g. lifting one API's branch coverage from 77% to 88% and statement coverage to 99%.
- Led system testing (ST) after each build: deployed to SIT environments, automated acceptance criteria as Cucumber BDD scenarios with Selenium WebDriver, and traced results to Jira Xray test plans and executions with test evidence.
- Led design and delivery of business account-authority journeys (add/remove signatories, operating rules) across React micro-frontends and Node.js experience APIs, including director and company-secretary validation.
- Drove root-cause analysis of production and SIT incidents using Splunk correlation tracing, turning findings into fixes, RCA documents and reusable patterns.
- Supported migration of service-request approvals to a new workflow platform, uplifting the tracker UI and backend contracts.
- Owned accessibility quality: tested, triaged and fixed WCAG 2.1 AA issues with screen readers (NVDA, VoiceOver, TalkBack) and keyboard-only navigation across the most-used desktop and mobile devices and browsers, and established form-validation and error-focus patterns as team conventions.

- Owned release quality: fixed CI/CD build failures, isolated squad changes from shared release branches, and remediated Snyk and SonarQube findings.
- Introduced an AI-first, spec-driven workflow: connected coding agents to Jira, Confluence, Bitbucket, CI, Splunk and Figma via MCP, authored reusable agent skills, and enforced human review and anti-fabrication checks.
- Refined epics and stories with product and design, triaged defects, led code reviews, and coordinated delivery with QA and partner teams.

Technical Lead (LTIMindtree (Westpac Banking) – Australia)

(Aug 2025 / 28-Nov 2025)

Company's details:

Address: Level 12, 680 George Street, Sydney, NSW 2000

Email: Info@ltimindtree.com

HR representatives: Roopa.Rd@ltimindtree.com / Hemalatha.A@ltimindtree.com

Website: <http://www.ltimindtree.com/>

At LTIMindtree, innovation meets seamless functionality to redefine the digital landscape. In the realm of cutting-edge technology consulting, LTIMindtree stands out as a transformative force. As a company dedicated to guiding businesses through comprehensive transformations, we specialize in navigating the path from core operations to immersive experiences, ensuring our clients thrive in the marketplace of the future. LTIMindtree possesses a distinctive fusion of engineering and experience DNA, facilitating an accelerated journey for businesses to reach the future faster.

Stepped up to Technical Lead on the enterprise banking engagement. Engaged through LTIMindtree; the client and place of work was Westpac Banking, Sydney.

Responsibilities:

- Led technical design and delivery for the squad, breaking down features, sequencing work and unblocking engineers across the SDLC.
- Ran code reviews and set coding and testing standards to keep delivery consistent, maintainable and production-ready.
- Acted as technical point of contact for product owners and partner teams, translating requirements into delivery plans and managing technical risk.
- Mentored engineers on the codebase, legacy-system context and engineering best practices.

Software Engineer (LTIMindtree (Westpac Banking) – Australia)

(30-Oct 2023 / Jul 2025)

Software engineer and consultant on enterprise digital banking systems, with the same employer, client and place of work as above.

Responsibilities:

- Delivered features end-to-end across the SDLC — requirements analysis, design, build, testing and deployment — against bank quality and security standards.
- Refactored and modernised legacy systems to improve performance, scalability and maintainability.
- Performed accessibility testing and remediation against WCAG 2.1 AA, verifying fixes with screen readers and keyboard navigation across the most-used desktop and mobile devices and browsers.
- Identified technical deficiencies in existing systems and processes, and recommended build-versus-buy solutions with clear trade-offs.
- Monitored production applications, diagnosed and resolved defects, and maintained technical and operational documentation.

- Provided expert advice on software design and development to stakeholders and delivery teams.

Full Stack Engineer (Xemplo – Australia)**(1-Sep-2022 / 27-Sep-2023)****Company's details:****Address:** Level 6, 52 Phillip Street Sydney, NSW 2000 AU**Contact number:** 1300 082 666**Hr representative:** sarahd@epggroup.com**Sister companies:**<https://www.xemplo.com/><https://www.epggroup.com/>

At Xemplo.com, innovation meets seamless functionality to redefine the digital landscape. Through the state-of-the-art services and products, Xemplo.com empowers clients to navigate the complexities of the digital world with confidence. With a focus on user-centric design and robust backend technologies, Xemplo.com crafts digital experiences that captivate audience and drive meaningful engagement.

Full stack engineer on Xemplo's HR, payroll and workforce-management SaaS platform.

Responsibilities:

- Delivered full-stack features end-to-end, from requirements analysis and design through implementation, testing and deployment.
- Built and maintained Laravel MVC applications (Eloquent ORM, middleware, controllers, service classes, routing) and RESTful APIs.
- Implemented server-side validation, authentication and authorisation using Laravel Validation and Form Requests.
- Designed asynchronous business workflows with Laravel Queues, Events, Jobs, Notifications and Task Scheduling.
- Translated Figma designs into responsive, production-ready interfaces with Vue.js, HTML, CSS and JavaScript.
- Modelled system behaviour with UML (state, class and sequence diagrams) and authored technical and end-user documentation.

Developer Programmer (Zobdegan – IRAN)**(6-Nov-2019 / 6-Aug-2022)****Company's Details:****Address:** Unit 104, 1st floor, Hiran Complex, No 0, Nabovat Blvd, Ardalan st, Karaj, Alborz, Iran**Phone number:** +98 912 082 1762**Email:** info@zobdeganweb.com**Website:** zobdeganweb.com

Zobdegan company in two branches with over 35 full-time employees is the leading digital marketing group in Karaj. A complete list of related services together with offering diverse technology stacks depending on client specifications and needs made the brand name on top of all other competitors. Current offered services are Advertisement, Programming Services, Application Maintaining, WebDevs, MobileDevs, SEO, Photography, Motion Graphic, Animation, Logo Design, Instagram administration, Teaser, Content Creation and many more.

Responsibilities:

- Designed, developed and supported multiple MVC-based client systems using JavaScript, TypeScript and modern frameworks.
- Ran client discovery sessions and translated business needs into technical specifications.
- Demonstrated working features to clients and iterated quickly on feedback.
- Diagnosed and resolved bugs and performance issues to keep systems stable and fast.
- Maintained and upgraded existing systems to meet evolving business needs, and wrote user guides to support client adoption.

Education

(30 Sept 2013 - 31 Jan 2017)

Bachelor of Science in Computer Engineering (ABET accredited program)

Eastern Mediterranean University, Famagusta, Cyprus

- Graduated as top student in the Computer Engineering faculty with high honors and with **GPA of 3.94 on a 4.00 scale**

Language Skills

- Persian: Native
- English: Full professional proficiency – fluent in reading, writing, and speaking – IELTS (Overall 7.5)
